

Align Technology is a publicly traded medical device company engaged in the design, manufacture and marketing of the Invisalign® system, the world's leading invisible orthodontic product, and the iTero® Intraoral scanning systems and services. Align Technology went public on the NASDAQ market under the trading symbol ALGN in January 2001.

## Align Announces New iTero Updates and Connectivity to Improve Customer Experience and Workflow for Dental Practices

November 23, 2018

- New iTero software upgrade with enhanced functionality improves scan quality and patient privacy
- New iTero connectivity with exocad® and Dentrrix® enhances both doctor and patient experience

SAN JOSE, Calif., Nov. 23, 2018 (GLOBE NEWSWIRE) -- Align Technology, Inc. (NASDAQ: ALGN) today announced multiple updates associated for the iTero® Element family of Intraoral scanner (*iTero* Element, Element 2 and Element Flex) which includes a new software upgrade with enhanced functionality and connectivity to two important digital dentistry leaders: exocad and Dentrrix. With these updates, *iTero* has strengthened its position in restorative and dental practice workflow and is able to help dentists offer a better and faster patient experience.

1.7 Software upgrade: With the 1.7 *iTero* scanner software upgrade that will be available through a gradual release, starting in late Nov., general dentists and orthodontists have access to new features that improve scan quality and provides additional functionality for patient data protection. These improved features include:

- Improved image quality and resolution of restorative model
- Direct visualization of high resolution scan in "scan mode"
- Improved scan process for prep segments and
- Inactivity log out feature that activates after a pre-defined period of system inactivity for greater privacy of patient information

In addition, a separate iTero software update this week also provided customers with an improvement in their experience at myitero.com, with clear visibility to file download status.

*iTero* Intraoral scanner open chair-side milling workflow with exocad ChairsideCAD software offers a fully-validated workflow between *iTero* Element Intraoral scanner and exocad ChairsideCAD to enable in-house milling of dental restoration on any compatible milling machine. With the flexibility of being able to choose chair-side workflow that works for their practice, dentists can focus on offering a better patient experience and faster treatment through same-day dentistry.

*iTero* Intraoral scanner is now integrated with Dentrrix patient management platform. This integration simplifies workflow and increases efficiency by eliminating the need to re-enter patient data for digital impressions taken using the *iTero* scanner by automatically inserting the scan into Dentrrix patient chart. This connectivity is available only in North America.

### About Align Technology, Inc.

Align Technology designs and manufactures the Invisalign® system, the most advanced clear aligner system in the world, and *iTero* intraoral scanners and services. Align's products help dental professionals achieve the clinical results they expect and deliver effective, cutting-edge dental options to their patients.
