

## **Align Technology, Inc. Announces Date of its Third Quarter 2002 Results and Conference Call**

Santa Clara, Calif. – October 16, 2002 -- Align Technology, Inc. (Nasdaq: ALGN), the inventor of Invisalign<sup>®</sup>, a proprietary method of straightening teeth without wires and brackets, today announced plans to release its third quarter 2002 financial results before the market opens on October 24, 2002. The earnings release will be available at the investor relations section of the company's website at [www.invisalign.com](http://www.invisalign.com).

On Thursday, October 24, 2002 at 10:00 a.m. EDT (7:00 a.m. PDT), Thomas Prescott, president and chief executive officer, and Eldon Bullington, chief financial officer, will host a conference call to discuss the third quarter 2002 financial results. A question and answer session will follow.

To listen to the call, please dial (415) 904-7375 approximately ten minutes prior to the start of the call and enter reservation number 20974693. If you are unable to listen to the call, a taped replay will also be available beginning approximately one hour after the call's conclusion and will remain available until 5:30 p.m. EDT on October 26, 2002 and can be accessed by dialing (800) 633-8284 with reservation number 20974693. The replay may be accessed from international locations by dialing (402) 977-9140 using the same reservation number.

Additionally, the conference call will be broadcast live over the Internet and can be accessed through the investor relations section of Align's website at [www.invisalign.com](http://www.invisalign.com). Please access the website at least fifteen minutes prior to the start of the call to register, download, and install any necessary audio software. An archived webcast replay of the call will also be available at [www.invisalign.com](http://www.invisalign.com).

### **About Align Technology, Inc.**

Align Technology designs, manufactures and markets Invisalign, a proprietary new method for treating malocclusion, or the misalignment of teeth. Invisalign corrects malocclusion using a series of clear, nearly invisible, removable appliances that gently move teeth to a desired final position. Because it does not rely on the use of metal or ceramic brackets and wires, Invisalign significantly reduces the aesthetic and other limitations associated with braces. Invisalign is appropriate for treating adults and older teens. Align Technology was founded in March 1997 and received FDA clearance to market Invisalign in 1998.

The foregoing information represents Align Technology's outlook only as of the date of this press release, and Align undertakes no obligation to update or revise any forward-looking statement, whether as a result of new developments or otherwise.
